Good morning Jed,

This email is a follow up to our phone conversation we had this morning regarding DPA related issues on the NDA.

1. The deck logbook states that on Thursday, January 29, 2015, that all 4 lifeboats were "launched and maneuvered". From what I have been told the boats were only lowered to the water and upon hitting the surface of the water they were brought back home. It is also my understanding that the boats were not released or maneuvered because no one was actually in the lifeboats. It is relevant to note that this was crew change day and the persons involved in this evolution reported aboard the rig that morning. The NDA's Chief Mate was not involved at all with this evolution.

2. During the USCG Annual inspection of February 10, 2015, there was an issue with the FRC davit. The NDA's Chief Mate Michael "Tyler" Gavis spoke with me on the phone about this situation for approximately 2 hours this past Monday evening. He told me he will tell the truth to whomever asks about the situation surrounding the FRC davit and the "deception" that was encouraged by Mr. Askins as well as what was deemed "operator error".

Thank you, Jed, for your time and consideration regarding this matter.

Sincerely,

Jeff
